PURCHASER'S ELECTRICITY RATE OPTION CHOICE

Alectra's default electricity rate option for new Residential and Small Business customers is Time-of-Use Pricing, unless Tiered Pricing is selected below. The purchaser is not locked into the rate option; they can submit a switch request at any time once their account is active.

Time-of-Use Pricing

Time-of-Use pricing reflects the cost of producing electricity at different times of day based on demand. Time-of-Use pricing has three periods: on- peak, when energy demand and cost is high, mid-peak, when energy demand and cost is moderate, and off-peak, when energy demand and cost is low. These prices are set by the Ontario Energy Board twice a year on May 1 and November 1.

Time-of-Use pricing ultimately gives you more control over your electricity bill. By adjusting your usage habits, Time-of-Use pricing enables you to save money during hours when electricity is more expensive. To learn more about Time-of-Use pricing and its three periods, visit www.oeb.ca.

Tiered Pricing

Tiered pricing is one price for usage based on a threshold amount and a higher price for usage over that threshold. The threshold for residential consumers changes twice a year on a seasonal basis; to 600 kilowatt-hours per month during the summer season (May 1 to October 31) and to 1,000 kilowatt-hours per month during the winter season (November 1 to April 30).

Tiered prices are set by the Ontario Energy Board twice a year on May 1 and November 1. To learn more visit www.oeb.ca.
